

## Fertilisers

### Agroblen

**15+9+9 (12 - 14 months)**

Specific Usage: Base fertilizer for top fruit trees.

Agroblen 15+9+9 is a resin controlled release fertilizer. This is the ideal fertilizer to provide the release characteristic suitable for replanting fruit trees. The release period is 12-14 months.

Agroblen controls the release of nutrients in line with the needs of the plant – a perfect match of supply and demand. You get bigger, more uniform plants with less time and work. Also, Agroblen gives you complete control over the nutrition program. It is the ideal combination of efficiency and simplicity.

**Pack size: 25kg**

**CODE: AGROB1**

### Sportsmaster Renovator Pro

**10+2+4**

New Sportsmaster Renovator Pro is the triple action fertilizer from Scotts. As well as providing essential nutrients to promote growth and improve colour, it contains two selective herbicides for routine and heavy weed control. In addition, it contains Iron for the control of moss and rapid green-up of the turf. Sportsmaster Renovator Pro has new lower application rates for ease of use and cost effective applications.

**Pack size: 25kg**

**CODE: MIR13**

### Cleanrun Pro

**10+2+4**

Sportsmaster Cleanrun Pro is a mini-granular compound fertilizer, containing two selective herbicides for a combined feed and weed application. This product can be used for all playing fields and outfield areas, including rugby and football pitches, tees, golf fairways and other recreational areas. Sportsmaster Cleanrun Pro has new lower application rates for ease of use and cost effective applications.

**Pack size: 25kg**

**CODE: CLEANRUN3**

### Sulphate of Potash

Plant food to promote fruit and flowers.

- Size: 25kg
- Area Treated: 714m<sup>2</sup>, 29m<sup>2</sup>
- Nutrients: NPK 0 - 0 - 48
- Recommended uses: Flowers, fruit bushes and trees
- Feeding recommendations: Base dressing 35g/m<sup>2</sup>
- Advice: Keep off leaves and stems

CODE: SULP3

### Sulphate of Iron

Plant food for lime-hating (ericaceous) plants.

- Sizes: 25kg
- Area Treated: 714m<sup>2</sup>, 29m<sup>2</sup>
- Nutrients: Iron (Fe) 19%
- Recommended uses: Moss control

CODE: SULP2

### Lawn Sand

The traditional treatment to control moss.

- Sizes: 185m<sup>2</sup>, 75m<sup>2</sup>
- Active ingredients: NPK 5-0-0 + Ferrous Sulphate
- Feeding recommendations: Anytime between late Spring and early Autumn
- Application Rate: 135gms/m<sup>2</sup>
- Useful Tip: Do not apply on wet or damp grass or in frost or drought conditions

CODE: TUR2

**Tree & Shrub Compost**

A peat-based compost prepared from rich dark peat with high buffer capacity and high moisture retention.

Size: 80L

N 210, P205 210, K20 370 g/m<sup>3</sup> pH 6.0

CODE: TREE2

**Decorative Bark Chips**

Smaller size bark chips made from entirely renewable resources, FSC approved.

- Size: 80L
- Approximate Area Covered: 3m<sup>2</sup>, 2.1m<sup>2</sup>
- Recommended Uses: Decorative mulch, children's play areas, suppression of weeds and moisture retention.
- Recommended depth: 2.5-5cm.

CODE: SHL1

## Soluble fertilisers

Krista K is a fully water soluble nitrogen and potassium fertilizer. It is a free flowing, fine crystalline powder which dissolves quickly in water without any residues. Krista K is suited to application through all fertigation systems - drip systems, low throw sprinklers, centre pivots and spray units.

CODE: POTN2

Krista-Mag is a fully water soluble nitrogen and magnesium fertilizer. It is a free flowing, fine crystalline powder which dissolves quickly in water without any residues. Krista-Mag is suited to application through all fertigation systems - hydroponics, drip systems, low throw sprinklers, centre pivots and spray units.

CODE: MAGN1

Krista-MAP is a fully water soluble nitrogen and phosphorus fertilizer. It is a free flowing, fine crystalline powder which dissolves quickly in water without any residues. Krista-MAP is suited to application through all fertigation systems - hydroponics, drip systems, low throw sprinklers, centre pivots and spray units.

CODE: MONO2

Krista-MgS is a fully water soluble sulphur and magnesium fertilizer. It is a free flowing, fine crystalline powder which dissolves quickly in water without any residues. Krista-MgS is suited to application through all fertigation systems - hydroponics, drip systems, low throw sprinklers, centre pivots and spray units.

CODE: BITTESAL25

## Soluble fertilisers

**Krista-SOP** is suitable for fertigation. Ideal where high potassium levels are required without additional nitrogen. Suitable for crops with a high sulphur demand. Very low chloride content. Highly soluble and dissolves very quickly.

CODE: POTC1

**Krista-MKP** is a clean, fully water soluble phosphorus and potassium fertilizer making it particularly suited to a wide range of horticultural crops. It is a free flowing, fine crystalline powder which dissolves quickly in water. Krista-MKP is suited to application through all fertigation systems - hydroponics, drip systems, low throw sprinklers, centre pivots, spray units, misters.

CODE: MONP1

**Krista-UP** has the highest solubility rate compared to other phosphate sources. The product dissolves very fast. **Krista-UP** is a very efficient acidifier. **Krista-UP** can reduce water hardness. Helps keep nozzles and dripper clean and free from clogging. Can be used as an alternative to acids. Helps to increase the availability of micronutrients in high pH conditions. Reduced N volatilization with use of **Krista-UP** urea phosphate.

CODE: UREAPHOSY

**Krista-Urea** is a fully water soluble urea nitrogen fertilizer. It is a free flowing white prill, which dissolves quickly in water without any residues.

CODE: UREA25

**Nitrogen Fertiliser 34.5% prilled in 600kg bags (Minimum order of 3000kg)**

CODE: NITR4

## Soluble fertilisers

### Calsal

Liquid Calcium Nitrate

Benefits:

- Calsal is a liquid calcium nitrate fertilizer
- Suited to application through all fertigation systems
- All nitrogen in the nitrate form
- Less than 0.002% NH<sub>4</sub>-N

Compatibility: Calsal can be mixed with all water soluble fertilizers except stock solutions containing either sulphate or phosphate.

Pack Size: Bulk, 1000 litre non-returnable IBC.

CODE: CALN6

### T-Flow Top

Liquid Nitrogen and Calcium fertilizer for placement and fertigation with fully available Calcium Oxide

Benefits of soluble Calcium:

#### Salads

- Helps prevent Internal Browning
- Helps prevent Tip Burn
- Low scorch risk when broadcast
- Improved marketability and shelf life
- Rapid greening in cool conditions

#### Potatoes

- Helps suppress internal rust spot
- Improve skin finish
- Helps reduce bacterial rots in store
- Calcium helps reduce crop stress
- Fertigation

Pack size: Bulk, 1000 litre non-returnable IBC.

CODE: TFLOWTOP1000

### Amnitra L

Liquid Ammonium Nitrate

Benefits:

- Amnitra L is a liquid nitrogen fertilizer, suited to application through all fertigation drip systems
- Safe to handle, non hazardous liquid ammonium nitrate

Compatibility: Can be used in combination with Calcinit, Magnitra L / Krista-Mag.

Pack Size: 20 litre cans (24.8kg)

CODE: NITR8

## Soluble fertilisers

### Yara Liva

CalciNit is a fully water soluble nitrogen and calcium fertilizer. It is a free flowing, fine granular material which dissolves quickly in water without any residues. CalciNit is suited to application through all fertigation systems - drip systems, low throw sprinklers, centre pivots and spray units.

Pack size: 25kg bags.

CODE: CALN2

### Kristalon

Water soluble NPK fertilizers for liquid feeding.

Benefits:

- Contain a full range of chelated trace elements.
- Ideal for all irrigation systems, drip, tape, sprinkler and pivot systems.

Pack size: 25kg. Polythene non slip bags.

Kristalon Blue 19-6-20  
Kristalon Orange 6-12-36

CODE: KRISTALONB  
CODE: KRISTALONO

### Classic Royale (21-8-11)

Uniform prilled compound fertilizer for Sportsfield application and general fertiliser for Spring and Summer.

Pack size: 25kg bags

CODE: 21811

### Paddock Royale (12-11-18)

A compound prilled fertilizer for horse and pony pastures. Balanced nutrients for plant and animal growth. Easy to handle 25kg bag. Accurate to apply compound fertilizer. All the elements in every prill for accurate application.

Pack size: 25kg bags

CODE: PADDOCKR

## Soluble fertilisers

### Ferticare Range

Water soluble fertilisers plus micronutrients.

These grades contain urea phosphate. Urea phosphate is a unique rapidly dissolving acid form of phosphate, ideal for helping keep nozzles and drippers free from deposits in hard water areas. For use in full hydroponic situations, trace elements are included in all feeds. These are designed to aid plant growth but not correct any deficiency. Enhanced levels of trace elements have been added to several grades as follows:

Boron (B) - 130 mg/kg  
 Copper (Cu) - 250mg/kg  
 Iron (Fe) - 600mg/kg  
 Manganese (Mn) - 250 mg/kg  
 Molybdenum(Mo) - 10 mg/kg  
 Zinc (Zn) - 100 mg/kg

Ferticare 10-52-17  
 Ferticare 12-6-36  
 Ferticare 13-4-42  
 Ferticare 18-18-18  
 Ferticare 18-0-36  
 Ferticare 22-4-22  
 Ferticare 28-10-10  
 Ferticare 7-6.3-34
